

Trinity Lea Weevie

Seeking Software Engineering Internship · Graduating May 2027

📞 Mobile (619) 852-7308 ✉ trinitylea@berkeley.edu [🌐 LinkedIn](#) [🐙 GitHub](#) [🌐 Portfolio](#)

Education

University of California, Berkeley

Fa '23 – Sp '27

B.A. in Data Science

Berkeley, CA

- Skills: data structures & algorithms (Java), machine learning (regression, classification, clustering), data wrangling & visualization, probability & statistical inference, optimization & linear programming
- Relevant Coursework: CS61B Data Structures, DATA100 Principles & Techniques of Data Science, STAT134 Concepts of Probability, IEOR162 Linear Programming & Network Flows, MATH53 Multivariable Calculus

University of Bologna

Fa '25

Study Abroad

Bologna, Italy

- Coursework focused on applied AI, data mining, and behavioral economics, with hands-on exposure to machine learning tools in industry contexts and market analysis methods

Experience

Developer, Web Development at Berkeley

Jan '26 – Present

Web Development at Berkeley

Berkeley, CA

- Build full-stack websites for real-world clients across student organizations and external partners
- Collaborate with designers and developers in client-facing build cycles to ship web applications using modern frameworks (Next.js, React, TypeScript, Tailwind CSS)

Data Science Intern, West Health

Summer '25

West Health – nonprofit research institute focused on reducing healthcare costs for older Americans

La Jolla, CA

- Built a classification pipeline on 2022 NHAMCS ED survey data to predict older adult status, performing missingness analysis, feature selection, and custom feature engineering across 900+ raw variables in Python (pandas, scikit-learn)
- Trained and tuned Logistic Regression (L1-regularized) and Random Forest models using 5-fold cross-validated grid search and threshold optimization, achieving AUCs of 0.84 and 0.85 on a holdout validation set
- Identified Alzheimer's disease and total chronic conditions as the strongest predictors of older adult ED utilization, surfacing actionable signals for downstream care-coordination research

House Manager, Cal Performances

Sep '24 – Present

Cal Performances, UC Berkeley

Berkeley, CA

- Lead 30+ ushers per shift for audiences of 3,000+, overseeing patron flow, ADA seating, and emergency procedures
- Train new ushers, resolve escalated patron and ticketing issues, and coordinate with production and venue leadership

Projects

CHAOS Berkeley Outdoor Club Website

Sep '25 – Present

Frontend Web Developer, Web Development at Berkeley

Berkeley, CA

- Collaborated with a team of developers to build a club website using Next.js (App Router), TypeScript, React, and Tailwind CSS, integrating Supabase for backend services and Framer Motion for UI animations
- Designed and built a reusable masonry gallery component with a custom lightbox supporting click-to-open, arrow navigation with wraparound, and click-outside-to-close behavior
- Implemented a dynamic API route that auto-loads images from organized subdirectories, eliminating the need to hardcode image paths as new content is added

Personal Portfolio | trinityleap.github.io/my-site

Sp '26

Solo Project

Remote

- Designed in Figma and built a personal portfolio site featuring an illustrated interactive desk scene as the primary navigation element, with custom animations built in Next.js, TypeScript, and Tailwind CSS
- Configured a CI/CD pipeline via GitHub Actions for automated deployment to GitHub Pages

Additional Skills

Programming Languages: Python, TypeScript, JavaScript, Java, R, SQL

AI Tools: Anthropic Claude API, prompt engineering, AI-assisted development (Cursor, Claude Code)

Certifications: AWS Cloud Practitioner (in progress)

Developer Tools: GitHub, VS Code, Figma, Jupyter Notebook, RStudio

Technologies: Git, React.js, Next.js, Tailwind CSS, Supabase, Framer Motion, Node.js, Flask, Pandas, NumPy, scikit-learn, Matplotlib, Seaborn, Plotly, PyTorch
